

Fall 2023 Descriptions

Home Run and Super Friday staff: June 12, 8:00am

Current Home Run and Super Friday families: June 14, 8:00am

New families (families who didn't attend Fall 2022 or Spring 2023): June 16, 8:00am

- For registration purposes, please use the age of your child ON SEPT 1, 2023.
- For children who were between the ages of 2-6 on September 1, 2023, there are no class choices, you will just choose Early Childhood. We will contact you with classroom assignments before the start of the semester.
- For all other students (7-13 on 9/1/23), you must select a CHOICE for ALL THREE CLASS PERIODS (first, second and third period). Friday Players is a two-period class that covers 2nd and 3rd period.

The information that follows is to help you and your child decide on their choices for each class period. Please be sure that you are looking at the right age group for each child! Some classes are only offered to certain ages or at certain periods.

Early Elementary (7-8 years old on September 1, 2023)

1ST PERIOD

Beginning LEGO Robotics- (\$50 class fee) (M. Criss)

(New students or repeat students who have not completed all their beginning projects. If you aren't sure of your child's status, please email Dawn Pruyn)

Go beyond just building with Legos and get started programming! Sounds, lights, and turns...can you and your creation meet the goal? Join us and find out.

In Beginning Robotics students will build structures and program them using the Lego Wedo2.0 app. The provided step-by-step projects are perfect for novel learners to acquire the mechanics of block coding.

Students must bring a tablet or laptop (not Fire or Android) each week, or have a partner in class with one. (One device needed for every two students.)

<https://education.lego.com/en-us/support/wedo-2/system-requirements>

Card Games* (C. Baldwin)

How many card games can you play? In our class we will have the opportunity to play different card games each week. Variety ranges from the classics to modern twists on some favorites. We will learn good sportsmanship, social skills, strategy, and most of all have fun.

Chess for All (B. Alder)

This class will show students how to move the pieces, how the game is won or lost, and basic tactics. For those who already know the basics, we will learn and build our strategies and skills through lessons and play.

Conversational Spanish (P. Bourde)

The class will appeal to all learning types as we will have fun playing many engaging games, completing crafts, singing songs and role playing in addition to practicing vocabulary and pronunciation to enable them to order in a restaurant, ask for help, and carry on a short conversation. Students will need to bring a pocket folder on the first day of class. They will take home the course outline as well as vocabulary sheets each week.

Countries and Cultures (V. Santana)

Join us as we take a trip around the world! We will play games, learn fun facts and a little geography as we explore a different country every week!

Crochet for all Levels (E. Goodrum)

Always wanted to crochet? Come and learn all of the basics at your own pace in a friendly environment or take your skills a step up. We will also work on some fun and easy projects!

Duct Tape Warfare (supply fee \$15) (T. Graves/C. Graves and M. Johnson/D. Ramirez)

For students new to Duct Tape Warfare and younger students

Come explore Medieval history and culture with us as we create Knight-style weapons out of duct tape, foam, and pvc pipe. No experience required!

LEGO Innovations (Gilbert and Bosquez)

Construct and unleash your creativity with Lego! Each week we will have a brief lesson and a Lego building challenge. During class each week, students will be able to build Lego models based on topics such as transportation, architecture, geography, history, and more! Each Lego challenge will allow the student to build his or her own creation, inspired by that week's lesson.

Nailed It! (supply fee \$15) (S. Curtis)

Join us for this Pinterest inspired class where we will conquer fun crafts that you can use, wear or hang on the wall!

New projects, so we welcome repeats!

Perler Beads (supply fee \$10) (A. Hampton)

Join us for a semester of fun making melty bead designs. Beads are placed on a peg board, then melted with a hot iron. Don't worry, an adult will be doing all of the ironing!

We will have some set projects, some challenge projects and some themed projects (without a set pattern!)

Great projects for both boys and girls!!

Pokemon Go! * (S. Brednich)

Gottacatch them all!! Join us as we explore the world of Pokemon. Students will use the Pokemon Go App to collect pokemons and battle with their friends. Must have a tablet or phone capable of running the app and connecting to Wifi.

Show Stoppers (class fee \$15) (M. Magill)

A new performance-based class that explores the world of theatre! We will use our class time to rehearse a variety show full of skits and small vignettes, pantomime, and a Broadway style musical number. This class has it all! There will be a performance at the end of the semester for friends and family, so we hope to see you onstage!

Speed Stacks Beginners (C. Miller)

Speed Stacks is one of the fastest growing sports and was inducted in 2010 into the Jr. Olympics. Speed stacking helps child stackers use both sides of their bodies and brains to develop important athletic and academic lifelong skills. With the use of stacked cups and a timer, students will develop hand-eye coordination, ambidexterity, quickness, and concentration. Most importantly, we will have lots of fun!

Students will need to purchase their own set of speed stacks cups, with a mat and timer. We usually make a group order a few weeks before classes begin.

Sportball (class fee \$65) T. Yates

Sportball teaches the fundamental skills of 8 different sports in a fun, stress-free, non-competitive setting. Classes keep kids moving and engaged and send them home with new skills. All equipment is provided by the Sportball coach. Sport instructions will cover basketball, soccer, t-ball, hockey, volleyball, tennis, golf, and football.

Students are welcome to take Sportball more than one time! There is so much to learn and skills will be improved each week.

Early Elementary (7-8 years old on September 1, 2023)

2ND PERIOD

Beginning LEGO Robotics- \$50 class fee (M. Criss) *(New students or repeat students who have not completed all of their beginning projects. If you aren't sure of your child's status, please email Dawn Pruyn)*

Go beyond just building with Legos and get started programming! Sounds, lights, and turns...can you and your creation meet the goal? Join us and find out. In Beginning Robotics students will build structures and program them using the Lego Wedo2.0 app. The provided step-by-step projects are perfect for novel learners to acquire the mechanics of block coding. *Students must bring a tablet or laptop (not Fire or Android) each week, or have a partner in class with one. (One device needed for every two students.)*

Card Games* (C. Baldwin)

How many card games can you play? In our class we will have the opportunity to play different card games each week. Variety ranges from the classics to modern twists on some favorites. We will learn good sportsmanship, social skills, strategy, and most of all have fun.

Chess for All (B. Alder)

This class will show students how to move the pieces, how the game is won or lost, and basic tactics. For those who already know the basics, we will learn and build our strategies and skills through lessons and play.

Students will need to bring a pocket folder on the first day of class. They will take home the course outline as well as vocabulary sheets each week.

Crochet for All Levels (E. Goodrum)

Always wanted to crochet? Come and learn all of the basics at your own pace in a friendly environment, or take your skills to the next level. We will also work on some fun and easy projects!

Dipping into Color- supply fee \$15 (J. Hornick)

Children will learn about the color wheel, primary, secondary and tertiary colors. They will learn mixing and creating colors, shading, shadowing and tones. Join us as we combine all these things and sprinkle in imagination to create colorful works of art!

Duct Tape Warfare (supply fee \$15) (T. Graves/C. Graves and M. Johnson/D. Ramirez)

Come explore Medieval history and culture with us as we create Knight-style weapons out of duct tape, foam, and pvc pipe. No experience required!

Gymnastics* (Estrada)

Join us for a fun and energetic class as we learn and grow in our flexibility, strength, balance, and coordination through gymnastics. For all levels of gymnasts: those wondering what gymnastics is all about, those who have lots of experience, and everyone in between!

LEGO Innovations (Gilbert/Bosquez)

Construct and unleash your creativity with Lego! Each week we will have a brief lesson and a Lego building challenge. During class each week, students will be able to build Lego models based on topics such as transportation, architecture, geography, history, and more! Each Lego challenge will allow the student to build his or her own creation, inspired by that week's lesson.

Nailed It! (supply fee \$15) (S. Curtis)

Join us for a semester of fun making melty bead designs. Beads are placed on a peg board, then melted with a hot iron. Don't worry, an adult will be doing all of the ironing!

We will have some set projects, some challenge projects and some themed projects (without a set pattern!)

Great projects for both boys and girls!!

Physical Education (J. Estrada & S. Siu)

Want to get your blood pumping? Feel the need to jump and shout? This class is all about fun!

We will be playing lots of games and generally having a great time, while we get moving! Come have some fun with us!

Pokemon Go! * (S. Brednich)

Gottacatch them all!! Join us as we explore the world of Pokemon. Students will use the Pokemon Go App to collect pokemons and battle with their friends. Must have a tablet or phone capable of running the app and connecting to Wifi.

Rubik's Cube (supply fee \$5)

Have you ever wanted to impress your friends by solving a Rubik's cube? This class will explore some different tips and tricks for solving a basic 3x3 Rubik's cube and introduce some other shapes and sizes of cubes often found in competitions.

Supply fee includes a speed turning cube.

Shades of New Possibilities, *drawing for all ages* (supply fee \$15) (J. Hornick)

Children will learn the basics of drawing in pencil and graphite, including different shading techniques, light sources, and how to place shadows for a more realistic effect. They will learn how to simplify objects, making drawing easier and more fun, while putting ideas on paper and giving their art more depth.

Speed Stacks Advanced (C. Miller)

Prerequisite: must have taken two semester of beginning speed stacks.

Students will take their stacking to the next level, learning more competitions, doubles, games and more advanced stacking!

Speed Stacks is one of the fastest growing sports and was inducted in 2010 into the Jr. Olympics. Speed stacking helps child stackers use both sides of their bodies and brains to develop important athletic and academic lifelong skills. With the use of stacked cups and a timer, students will develop hand-eye coordination, ambidexterity, quickness, and concentration. Most importantly, we will have lots of fun!

Students will need to purchase their own set of speed stacks cups, with a mat and timer. We usually make a group order a few weeks before classes begin.

Upper Elementary(9-10 years old on September 1, 2023)

1ST PERIOD

Beginning LEGO Robotics- (\$50 class fee) (M. Criss)

(New students or repeat students who have not completed all their beginning projects. If you aren't sure of your child's status, please email Dawn Pruyn)

Go beyond just building with Legos and get started programming! Sounds, lights, and turns...can you and your creation meet the goal? Join us and find out.

In Beginning Robotics students will build structures and program them using the Lego Wedo2.0 app. The provided step-by-step projects are perfect for novel learners to acquire the mechanics of block coding.

Students must bring a tablet or laptop (not Fire or Android) each week, or have a partner in class with one. (One device needed for every two students.)

Countries and Cultures (V. Santana)

Join us as we take a trip around the world! We will play games, learn fun facts and a little geography as we explore a different country every week!

Crochet for all Levels (E. Goodrum)

Always wanted to crochet? Come and learn all of the basics at your own pace in a friendly environment, or take your skills a step up. We will also work on some fun and easy projects!

Dimensional Creations Introductory – supply fee \$10 (L. Stinnett)

Welcome to the wonderful world of 3D plastic canvas creations. This course will merge the stitches from embroidery with the art of 3D construction. It is a self-paced crafting course that includes instruction on a variety of stitches, learning to read patterns as well as an introduction to assembling 3 dimensional structures. Students will create items that are both decorative and practical (like needle holders, crosses, wall art, pumpkins, pencil holders and Christmas ornaments). The class will start with an introduction to the basics of plastic canvas then move into 3D designs and constructions.

Please consider that this class will involve a high level of fine motor skills and concentration to complete the tasks.

Dipping into Color- supply fee \$15 (J. Hornick)

Children will learn about the color wheel, primary, secondary and tertiary colors. They will learn mixing and creating colors, shading, shadowing and tones. Join us as we combine all these things and sprinkle in imagination to create colorful works of art!

Duct Tape Warfare (supply fee \$15) (T. Graves/C. Graves and M. Johnson/D. Ramirez)

For students new to Duct Tape Warfare and younger students

Come explore Medieval history and culture with us as we create Knight-style weapons out of duct tape, foam, and pvc pipe. No experience required!

Jewelry Making (supply fee \$15) (J. Pederson)

Students will learn to use a variety of jewelry making tools and supplies to create a wide range of projects consisting of earrings, bracelets, necklaces, ear cuffs, anklets, rings, and more! Each week we will do a new piece of jewelry customizable to each student- no two pieces will be alike. Please consider that this class will involve a high level of fine motor skills to complete tasks.

LEGO Innovations (Gilbert and Bosquez)

Construct and unleash your creativity with Lego! Each week we will have a brief lesson and a Lego building challenge. During class each week, students will be able to build Lego models based on topics such as transportation, architecture, geography, history, and more! Each Lego challenge will allow the student to build his or her own creation, inspired by that week's lesson.

Nailed It! (supply fee \$15) (S. Curtis)

Join us for this Pinterest inspired class where we will conquer fun crafts that you can use, wear or hang on the wall!

New projects, so we welcome repeats!

Nutrition& Fitness (J. Estrada & S. Siu) *For students 10 and older*

This class is based on 1 Corinthians 6:19, "Don't you realize that your body is the temple of the Holy Spirit, who lives in you and was given to you by God? We will look at how to be good stewards of our bodies by fueling it and strengthening it. We will learn exercises with bands and body weight to be the best we can be for His glory!

Perler Beads (supply fee \$10) (A. Hampton)

Join us for a semester of fun making melty bead designs. Beads are placed on a peg board, then melted with a hot iron. Don't worry, an adult will be doing all of the ironing! We will have some set projects, some challenge projects and some themed projects (without a set pattern!) Great projects for both boys and girls!!

Pokemon Go! * (S. Brednich)

Gottacatch them all!! Join us as we explore the world of Pokemon. Students will use the Pokemon Go App to collect pokemons and battle with their friends. Must have a tablet or phone capable of running the app and connecting to Wifi.

Show Stoppers (class fee \$15) (M. Magill)

A new performance-based class that explores the world of theatre! We will use our class time to rehearse a variety show full of skits and small vignettes, pantomime, and a Broadway style musical number. This class has it all! There will be a performance at the end of the semester for friends and family, so we hope to see you onstage!

Sportball teaches the fundamental skills of 8 different sports in a fun, stress-free, non-competitive setting. Classes keep kids moving and engaged and send them home with new skills. All equipment is provided by the Sportball coach. Sport instructions will cover basketball, soccer, t-ball, hockey, volleyball, tennis, golf, and football.

Students are welcome to take Sportball more than one time! There is so much to learn and skills will be improved each week.

Strategy Board Games ADVANCED (W. Berry)

In this class, your student will work to develop their very own board game! Working with a partner or sometimes in a group, students will brainstorm, design, develop and test their game, ending the semester with a working game!

Optional Extras: As some students may need a little extra time, there will be a few optional extra class times on Wednesday afternoons at Dayspring Church. Details will be shared at the beginning of the semester.

Upper Elementary (9-10 years old on September 1, 2023)

2ND PERIOD

Beginning LEGO Robotics- \$50 class fee (M. Criss) *(New students or repeat students who have not completed all of their beginning projects. If you aren't sure of your child's status, please email Dawn Pruyn)*

Students are welcome to take Sportball more than one time! There is so much to learn and skills will be improved each week.

Strategy Board Games (W. Berry)

Strategy Board Games is a class for students to learn and play board games. Students will work on team work, sportsmanship, and strategy. Board games are an excellent learning tool in which students don't even realize they are learning because they are having so much fun! Potential games include Settlers of Catan, Pandemic, Trekking the National Parks, 7 Wonders and Stone Age.

Upper Elementary (9-10 years old on September 1, 2023)

3RD PERIOD

ADV LEGO Robotics (class fee \$50) *(must have teacher approval, if you aren't sure if your child qualifies, contact Dawn Pruyn)*

Go beyond just building with Legos and get started programming! Sounds, lights, and turns...can you and your creation meet the goal? Join us and find out.

In Advanced Robotics students will build structures and program them using the LegoWedo2.0 app. Students will use their prior skills and imaginations to complete the LegoWedo2.0 open-ended projects and challenges.

Students must bring a tablet or laptop (not Fire or Android) each week, or have a partner in class with one. (One device needed for every two students.)

<https://education.lego.com/en-us/support/wedo-2/system-requirements>

Card Games* (C. Baldwin)

How many card games can you play? In our class we will have the opportunity to play different card games each week. Variety ranges from the classics to modern twists on some favorites. We will learn good sportsmanship, social skills, strategy, and most of all have fun.

Countries and Cultures (V. Santana)

Join us as we take a trip around the world! We will play games, learn fun facts and a little geography as we explore a different country every week!

Crochet for All Levels (E. Goodrum)

Always wanted to crochet? Come and learn all of the basics at your own pace in a friendly environment, or take your skills to the next level. We will also work on some fun and easy projects!

Exponential Expeditions* (L. Stinnett)

Did you just say, "Oh no, not math!" That's okay, because this is not your typical math class! In this class, we'll discover that math is not just about solving equations; it's a captivating journey

filled with puzzles, brainteasers, and mind-boggling games. Join us this semester and prepare to unlock the secrets of mathematics through engaging activities and brain-boosting fun!

Forge Engine* (W. Berry & A. Bryant)

Join us on a semester long adventure in an immersive role playing game! Students will spend time creating their characters and designing the campaign we will engage in. After creating their character and campaign, students will collaborate to solve problems and develop the adventure.

Needed: Each student will need a 10-sided die

Friday Players (class fee \$35) (M. Magill)

It's show time!! Friday Players is a TWO PERIOD musical theatre class for children ages 9-13. (2ND AND 3RD PERIOD, with snack time in the middle)

The children will receive a script along with songs and we will rehearse our play during our class time. There will be a performance at the end of the semester to show off our hard work. We hope to see you onstage!

****Please note this class requires work and time OUTSIDE of our class time to memorize and learn their routines. ****

Join us for a semester of fun making melty bead designs. Beads are placed on a peg board, then melted with a hot iron. Don't worry, an adult will be doing all of the ironing!

We will have some set projects, some challenge projects and some themed projects (without a set pattern!) Great projects for both boys and girls!!

Physical Education (S. Siu)

Want to get your blood pumping? Feel the need to jump and shout? This class is all about fun! We will be playing lots of games and generally having a great time, while we get moving! Come have some fun with us!

Pokemon Go! * (S. Brednich)

Gottacatch them all!! Join us as we explore the world of Pokemon. Students will use the Pokemon Go App to collect pokemons and battle with their friends. Must have a tablet or phone capable of running the app and connecting to Wifi.

Rubik's Cube (supply fee \$5)

Have you ever wanted to impress your friends by solving a Rubik's cube? This class will explore some different tips and tricks for solving a basic 3x3 Rubik's cube and introduce some other shapes and sizes of cubes often found in competitions.

Supply fee includes a speed turning cube.

Shades of New Possibilities, *drawing for all ages* (supply fee \$15) (J. Hornick)

Children will learn the basics of drawing in pencil and graphite, including different shading techniques, light sources, and how to place shadows for a more realistic effect. They will learn how to simplify objects, making drawing easier and more fun, while putting ideas on paper and giving their art more depth.

Speed Stacks Advanced (C. Miller)

Prerequisite: must have taken two semester of beginning speed stacks.

Students will take their stacking to the next level, learning more competitions, doubles, games and more advanced stacking!

Speed Stacks is one of the fastest growing sports and was inducted in 2010 into the Jr. Olympics. Speed stacking helps child stackers use both sides of their bodies and brains to develop important athletic and academic lifelong skills. With the use of stacked cups and a timer, students will develop hand-eye coordination, ambidexterity, quickness, and concentration. Most importantly, we will have lots of fun!

Students will need to purchase their own set of speed stacks cups, with a mat and timer. We usually make a group order a few weeks before classes begin.

JHIGH (11-13 years old on September 1, 2023)

1ST PERIOD

Beginning LEGO Robotics- (\$50 class fee) (M. Criss)

(New students or repeat students who have not completed all their beginning projects. If you aren't sure of your child's status, please email Dawn Pruyn)

Go beyond just building with Legos and get started programming! Sounds, lights, and turns...can you and your creation meet the goal? Join us and find out.

In Beginning Robotics students will build structures and program them using the Lego Wedo2.0 app. The provided step-by-step projects are perfect for novel learners to acquire the mechanics of block coding.

Students must bring a tablet or laptop (not Fire or Android) each week, or have a partner in class with one. (One device needed for every two students.)

<https://education.lego.com/en-us/support/wedo-2/system-requirements>

Card Games* (C. Baldwin)

How many card games can you play? In our class we will have the opportunity to play different card games each week. Variety ranges from the classics to modern twists on some favorites. We will learn good sportsmanship, social skills, strategy, and most of all have fun.

Chess for All (B. Alder)

This class will show students how to move the pieces, how the game is won or lost, and basic tactics. For those who already know the basics, we will learn and build our strategies and skills through lessons and play.

Conversational Spanish (P. Bourde)

The class will appeal to all learning types as we will have fun playing many engaging games, completing crafts, singing songs and role playing in addition to practicing vocabulary and pronunciation to enable them to order in a restaurant, ask for help, and carry on a short conversation. Students will need to bring a pocket folder on the first day of class. They will take home the course outline as well as vocabulary sheets each week.

Crochet for all Levels (E. Goodrum)

Always wanted to crochet? Come and learn all of the basics at your own pace in a friendly environment, or take your skills a step up. We will also work on some fun and easy projects!

Dimensional Creations Introductory – supply fee \$10 (L. Stinnett)

Welcome to the wonderful world of 3D plastic canvas creations. This course will merge the stitches from embroidery with the art of 3D construction. It is a self-paced crafting course that includes instruction on a variety of stitches, learning to read patterns as well as an introduction to assembling 3 dimensional structures. Students will create items that are both decorative and practical (like needle holders, crosses, wall art, pumpkins, pencil holders and Christmas ornaments). The class will start with an introduction to the basics of plastic canvas then move into 3D designs and constructions.

Please consider that this class will involve a high level of fine motor skills and concentration to complete the tasks.

Dipping into Color- supply fee \$10 (J. Hornick)

Children will learn about the color wheel, primary, secondary and tertiary colors. They will learn mixing and creating colors, shading, shadowing and tones. Join us as we combine all these things and sprinkle in imagination to create colorful works of art!

Duct Tape Warfare (supply fee \$15) (T. Graves/C. Graves and M. Johnson/D. Ramirez)

For students new to Duct Tape Warfare and younger students

Come explore Medieval history and culture with us as we create Knight-style weapons out of duct tape, foam, and pvc pipe. No experience required!

Jewelry Making (supply fee \$15) (J. Pederson)

Students will learn to use a variety of jewelry making tools and supplies to create a wide range of projects consisting of earrings, bracelets, necklaces, ear cuffs, anklets, rings, and more! Each week we will do a new piece of jewelry customizable to each student- no two pieces will be alike. Please consider that this class will involve a high level of fine motor skills to complete tasks.

LEGO Innovations (Gilbert and Bosquez)

Construct and unleash your creativity with Lego! Each week we will have a brief lesson and a Lego building challenge. During class each week, students will be able to build Lego models based on topics such as transportation, architecture, geography, history, and more! Each Lego challenge will allow the student to build his or her own creation, inspired by that week's lesson.

Nailed It! (supply fee \$15) (S. Curtis)

Join us for this Pinterest inspired class where we will conquer fun crafts that you can use, wear or hang on the wall!

New projects, so we welcome repeats!

Nutrition& Fitness (J. Estrada & S. Siu) *For students 10 and older*

This class is based on 1 Corinthians 6:19, "Don't you realize that your body is the temple of the Holy Spirit, who lives in you and was given to you by God? We will look at how to be good stewards of our bodies by fueling it and strengthening it. We will learn exercises with bands and body weight to be the best we can be for His glory!

Perler Beads (supply fee \$10) (A. Hampton)

Join us for a semester of fun making melty bead designs. Beads are placed on a peg board, then melted with a hot iron. Don't worry, an adult will be doing all of the ironing!

We will have some set projects, some challenge projects and some themed projects (without a set pattern!)

Great projects for both boys and girls!!

Pokemon Go! * (S. Brednich)

Gottacatch them all!! Join us as we explore the world of Pokemon. Students will use the Pokemon Go App to collect pokemons and battle with their friends. Must have a tablet or phone capable of running the app and connecting to Wifi.

Show Stoppers (class fee \$15) (M. Magill)

A new performance-based class that explores the world of theatre! We will use our class time to rehearse a variety show full of skits and small vignettes, pantomime, and a Broadway style musical number. This class has it all! There will be a performance at the end of the semester for friends and family, so we hope to see you onstage!

Speed Stacks Beginners (C. Miller)

Speed Stacks is one of the fastest growing sports and was inducted in 2010 into the Jr. Olympics. Speed stacking helps child stackers use both sides of their bodies and brains to develop important athletic and academic lifelong skills. With the use of stacked cups and a timer, students will develop hand-eye coordination, ambidexterity, quickness, and concentration. Most importantly, we will have lots of fun!

Students will need to purchase their own set of speed stacks cups, with a mat and timer. We usually make a group order a few weeks before classes begin.

Sportball (class fee \$65) T. Yates

Sportball teaches the fundamental skills of 8 different sports in a fun, stress-free, non-competitive setting. Classes keep kids moving and engaged and send them home with new skills. All equipment is provided by the Sportball coach. Sport instructions will cover basketball, soccer, t-ball, hockey, volleyball, tennis, golf, and football.

Students are welcome to take Sportball more than one time! There is so much to learn and skills will be improved each week.

Storytelling 101 (J. Jackson)

Turn small ideas into a big story! Learn tips and tricks for becoming a better storyteller through writing, maps, comics and more. Put your imagination and critical thinking skills to work as you learn world-building, character development, and the descriptive elements of a story.

Strategy Board Games ADVANCED (W. Berry)

In this class, your student will work to develop their very own board game! Working with a partner or sometimes in a group, students will brainstorm, design, develop and test their game, ending the semester with a working game!

Optional Extras: As some students may need a little extra time, there will be a few optional extra class times on Wednesday afternoons at Dayspring Church. Details will be shared at the beginning of the semester.

JHIGH (11-13 years old on September 1, 2023)

2ND PERIOD

Beginning LEGO Robotics- \$50 class fee (M. Criss) *(New students or repeat students who have not completed all of their beginning projects. If you aren't sure of your child's status, please email Dawn Pruyn)*

Go beyond just building with Legos and get started programming! Sounds, lights, and turns...can you and your creation meet the goal? Join us and find out. In Beginning Robotics students will build structures and program them using the Lego Wedo2.0 app. The provided step-by-step projects are perfect for novel learners to acquire the mechanics of block coding. *Students must bring a tablet or laptop (not Fire or Android) each week, or have a partner in class with one. (One device needed for every two students.)*

Card Games* (C. Baldwin)

How many card games can you play? In our class we will have the opportunity to play different card games each week. Variety ranges from the classics to modern twists on some favorites. We will learn good sportsmanship, social skills, strategy, and most of all have fun.

Chess for All (B. Alder)

This class will show students how to move the pieces, how the game is won or lost, and basic tactics. For those who already know the basics, we will learn and build our strategies and skills through lessons and play.

Countries and Cultures (V. Santana)

Join us as we take a trip around the world! We will play games, learn fun facts and a little geography as we explore a different country every week!

Crochet for All Levels (E. Goodrum)

Always wanted to crochet? Come and learn all of the basics at your own pace in a friendly environment, or take your skills to the next level. We will also work on some fun and easy projects!

Dimensional Creations Introductory & Advanced – supply fee \$10 (L. Stinnett)

Welcome to the wonderful world of 3D plastic canvas creations. This course will merge the stitches from embroidery with the art of 3D construction. It is a self-paced crafting course that includes instruction on a variety of stitches, learning to read patterns as well as an introduction to assembling 3 dimensional structures. Students will create items that are both decorative and practical (like needle holders, crosses, wall art, pumpkins, pencil holders and Christmas ornaments). The class will start with an introduction to the basics of plastic canvas then move into 3D designs and constructions.

Advanced Students: Are you ready to take on more challenging projects? For your level, this will be a self-paced course that includes instruction on a variety of advanced stitches and constructions.

Please consider that this class will involve a high level of fine motor skills and concentration to complete the tasks.

Duct Tape Warfare (supply fee \$15) (T. Graves/C. Graves and M. Johnson/D. Ramirez)

Come explore Medieval history and culture with us as we create Knight-style weapons out of duct tape, foam, and pvc pipe. No experience required!

Friday Players (class fee \$35) (M. Magill)

It's show time!! Friday Players is a TWO PERIOD musical theatre class for children ages 9-13. (2ND AND 3RD PERIOD, with snack time in the middle)

The children will receive a script along with songs and we will rehearse our play during our class time. There will be a performance at the end of the semester to show off our hard work. We hope to see you onstage!

****Please note this class requires work and time OUTSIDE of our class time to memorize and learn their routines. ****

Girls Bible Study with Prayer and Journaling (class fee \$15) (S. Siu)

Join us to study, learn, pray and encourage one another in our walk.

Gymnastics* (Estrada)

Join us for a fun and energetic class as we learn and grow in our flexibility, strength, balance, and coordination through gymnastics. For all levels of gymnasts: those wondering what gymnastics is all about, those who have lots of experience, and everyone in between!

Jewelry Making (supply fee \$20) (J. Pederson)

Students will learn to use a variety of jewelry making tools and supplies to create a wide range of projects consisting of earrings, bracelets, necklaces, ear cuffs, anklets, rings, and more! Each week we will do a new piece of jewelry customizable to each student- no two pieces will be alike. Please consider that this class will involve a high level of fine motor skills to complete tasks.

LEGO Innovations (Gilbert/Bosquez)
